

C28R

- Chassis pictured with optional components.

birels work

Since the beginning of the "Cadet Kart" movement (short wheelbase for younger and small drivers), the Birel C28 has been a leader in ease of use, design, simplicity and success. The C28 has easily been the most popular and successful "cadet" chassis with local, regional and national wins since its inception and the new C28R continues this winning heritage. Whether your goal is a championship run in Cadet, Sportsman or Rotax competition in either Micro or Mini Max, the C28 has been a stepping stone for many hundreds of new kart racers that have grown up in our sport.
